

One device. Endless possibilities.

Improve patient outcomes, through earlier diagnosis, with Q-POC™ by QuantuMDx

You no longer need to wait days for test results to inform clinical decisions.

Our rapid point of care PCR testing produces COVID-19 results in approximately 30 minutes, so you can provide informed treatment options to meet your patient needs:

Keep busy emergency departments moving

PROBLEM

Waiting on lab results delays urgent treatment & overwhelms limited isolation areas & resources

SOLUTION

30 minute testing prior to admission enables effective & informed triage while containing the virus

OUTCOME

Immediate diagnosis & treatment improves patient outcomes and reduces daily admissions

Reduce anxiety for parents to be

PROBLEM

Expectant parents require rapid testing to reduce risk of transmission & ensure safe delivery

SOLUTION

Simplified workflow allows testing during admission examination & enabling immediate admission of women in established labour

OUTCOME

Informed cohorting by Covid status to provide peace of mind for birthing parents

Streamline surgeries

PROBLEM

Backlog of operations exacerbated by Covid risk mitigations, and increased risk of infection with testing 72 hrs in advance

SOLUTION

Quality testing ensures pre-op confidence & reduces downtime with no closed door policy post-intubation & extubation

OUTCOME

Improve patient quality of life while addressing backlog safely with increased capacity & virus containment

Simple, fast, powerful.

Get the future of diagnostics today with Q-POC™ by QuantuMDx.
