

Comprehensive transplant assay menu (available size: 24 or 48 reactions)

	Plasma	Whole blood	Urine	CSF	Swab	BAL
Toxoplasma gondii DNA detection kit	█					
CMV DNA quantitative detection kit	█	█				
EBV DNA quantitative detection kit	█	█				
BKV DNA quantitative detection kit	█		█			
HSV1 DNA quantitative detection kit	█			█		
HSV2 DNA quantitative detection kit	█			█		
VZV DNA quantitative detection kit	█			█		
HHV6 DNA quantitative detection kit	█	█				
HHV8 DNA quantitative detection kit	█	█				
JCV DNA quantitative detection kit	█		█	█		
Adenovirus quantitative detection kit*	█				█	█
Parvovirus quantitative detection kit*	█				█	█

CSF, cerebrospinal fluid; *available soon

Respiratory infections assay menu (available size: 24 or 48 reactions)

The A.Menarini Diagnostics respiratory panel assays for use with PRIME MDx platform provide rapid and accurate detection and differentiation of co-occurring respiratory viruses in a single reaction to give healthcare providers confidence in their results and decisions.

	Swab	Saliva
SARS CoV-2 detection kit	█	█
Flu-SC2-RSV detection kit	█	█
Flu-SC2 detection kit	█	█
Flu A/B detection kit	█	█
RSV A/B detection kit	█	█

RNA/DNA extraction kits - pre-filled format

PRIME MDx Swab-Saliva DNA/RNA extraction kit 2x24 rxn
PRIME MDx Swab-Saliva DNA/RNA extraction kit 2x48 rxn
PRIME MDx DNA/RNA extraction kit 2x24 rxn
PRIME MDx DNA/RNA extraction kit 2x48 rxn
